

Institute for Genomic Biology

Goals	Metrics
1. Establish the IGB and therefore UIUC as a leader in genomics and life sciences research.	<ul style="list-style-type: none"> • External recognition of IGB faculty and programs • <i># of publications in top ranked journals</i>
2. Fully develop the nine research themes selected for inclusion in the IGB.	<ul style="list-style-type: none"> • Total grant funding per theme • # of licenses, patents and invention disclosure per theme • # of startup companies per theme • External recognition of IGB theme faculty and programs • <i># of publications in top ranked journals per theme</i>
3. Secure \$12M per year in external funding by FY10.	<ul style="list-style-type: none"> • Total grant funding
4. Develop and maintain state-of-the-art “core facilities” to support the overall objectives and goals of the IGB Research Themes.	<ul style="list-style-type: none"> • Overall usage of facility • # of IGB users, campus users • # of instrumentation grants • External Advisory Committee Report • <i># of publication involving use of Core Facilities</i>
5. Establish the IGB as an engine for economic development by fostering thematic research with clear potential for practical outcomes.	<ul style="list-style-type: none"> • # of licenses, patents, and invention disclosures • # of startup companies • Patent royalty income

Italics indicates campus progress indicators to be included at the college/unit level
